ABOUT ME

AI Engineer experience in building enterprise-grade LLM applications, RAG systems, and AI automation using Azure OpenAI, Prompt Flow, FastAPI, and Azure Functions. Strong expertise in designing conversational agents, vector-embedding pipelines, semantic retrieval, and scalable backend services. Delivered production AI solutions used by major enterprise clients and optimized high-impact data workflows with measurable business outcomes.

SKILLS

Generative AI: Azure OpenAI, Claude, Gemini, Mistral, Chat Completion APIs, Embeddings, Vector Search, RAG, Prompt Engineering, Prompt Flow, Semantic Ranking, Copilot Studio, MCP, AWS Bedrock

Agentic AI & Frameworks: AI Agents, Agentic AI, LangChain, LangGraph, N8N, LLM Fine Tuning

Backend & Cloud: FastAPI, Flask, Django, API Development, Azure Functions, CI/CD, DevOps Workflows, AWS EC2, AWS S3

Databases: CosmosDB, MongoDB, SQL, Snowflake

PROFESSIONAL EXPERIENCE

AI Product Consultant | EasyRewardz

March 2025 – Present

- Led development of an LLM-powered AI chatbot for product queries, reducing manual support effort by 35–40% and cutting first-response time by 50%.
- Built a conversational flow module in an AI WhatsApp chatbot, driving a 9% rise in customer satisfaction.
- Developed an AI-based content recommendation engine for WhatsApp, SMS, and Email, reducing campaign team effort by 30% and accelerating go-to-market by 25%.
- Launched Cart Boost system with intelligent coupon and nudge recommendations, improving checkout conversions by 8–12% and recovering abandoned cart revenue.
- Built AI-powered KPI insight and recommendation modules, reducing Power BI dependency by 40% and manual analysis effort by 30%.
- Built API-driven automation flows and backend services using FastAPI, Azure Functions, and CI/CD pipelines.
- Implemented prompt optimization, response classification, and hallucination-reduction techniques across chatbot systems.
- Led projects end-to-end and mentored junior engineers.

AI Engineer | Freelance

Sep 2023 – Feb 2025

- Developed and deployed a GenAI-powered chatbot using LLMs to automate customer interactions and provide contextual responses based on user queries and business knowledge.
- Designed conversational workflows, prompt strategies, and user journeys to handle product discovery, customer support, and engagement use cases, improving response efficiency and user experience.
- Built integrations with business systems and data sources to enable personalized, context-aware recommendations and automated customer communication.
- Collaborated with stakeholders to define chatbot requirements, user permissions, and access controls, ensuring secure and scalable deployment across multiple user roles.
- Monitored chatbot performance using user engagement, resolution rate, response accuracy, and adoption metrics, driving continuous improvements through iterative testing and optimization.

Product Manager | Lynkit

June 2023 – Oct 2023

- Led product strategy and development for Lynktrac, an IoT-based SaaS platform.
- Orchestrated cross-functional teams to execute product roadmap and prioritize features for customer value.
- Leveraged Agile methodologies to deliver continuous improvements and meet project timelines effectively.
- Used JIRA to track progress, manage sprints, and facilitate transparent communication across teams.
- Implemented whitelisting of URLs to enhance platform API security.
- Oversaw integration projects to ensure interoperability and data consistency across platforms.

Product Manager | Wigzo by Shiprocket

March 2022 – Feb 2023

- Led cross-functional teams in creating and executing product roadmaps based on customer feedback and business objectives.
- Implemented Agile methodologies such as Scrum and Kanban, reducing time-to-market by 30%.
- Led development of scalable RESTful APIs for seamless integration with third-party services.
- Developed product specifications, user stories, and acceptance criteria to guide development and ensure quality.
- Facilitated sprint planning, stand-ups, and retrospectives to improve productivity and collaboration.

EDUCATION & CERTIFICATIONS

Education: Dr. APJ Abdul Kalam Technical University | Computer Science and Engineering | CGPA: 7.33

Certifications: Google Project Management, Databases and SQL, Foundations of Project Management – Google, Project Initiation – Google, Data Visualization and Communication with Tableau, Data Analysis with Python
